PROFESSIONAL SUMMARY

Passionate IT student with proven project experience spanning full-stack web development, computer vision, and IoT systems. Independently built a real-time bus tracking platform using Next.js and Firebase, and an AI-powered attendance system using Python and OpenCV. Proficient in React, Node.js, MySQL, and Git — with a strong drive to engineer clean, practical solutions to real-world problems.

EDUCATION

B.Tech in Information Technology | SRM Madurai College for Engineering and Technology, TN

Expected Graduation: 2027 | CGPA: 7.61 (up to 5th Semester)

HSC | CEOA Matriculation Higher Secondary School, Madurai, TN | May 2023

TECHNICAL SKILLS

Languages: C++, Java, Python, C

Web Technologies: React, Next.js, Node.js, Express.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Framer Motion

Databases: MySQL, SQLite, Firebase Firestore

Tools & Concepts: Git, GitHub, VS Code, Postman, Arduino IDE, REST APIs, OOP, Data Structures

INTERSHIPS

Web Design Intern | Four Step Solutions | *Dec 2024 – Jan 2025*

- Designed and delivered responsive UI components for 3+ client projects, reducing design inconsistencies and improving overall UX.
- Collaborated with a 5-member team to integrate front-end designs into live codebases, cutting design-to-deployment time significantly.

Full Stack Development Intern | Arutra Solutions | *Jun 2025 – Jul 2025*

- Engineered and shipped full-stack features using React and Node.js, contributing to 2+ live production modules.
- Participated in daily Agile standups and code reviews, resolving 10+ bugs and improving overall team delivery speed.

IoT, Drone & Robotics Intern | AITRA | *Dec 2025 – Jan 2026*

- Engineered sensor-integrated IoT prototypes using Arduino, achieving reliable real-time data acquisition with <50ms latency.
- Built hardware-software interfaces for autonomous drone systems, integrating 3+ sensor modules for navigation and control.

PROJECTS

Face Recognition Attendance System | Python, OpenCV, face_recognition, CSV

- Automated real-time attendance tracking using Python and OpenCV facial recognition, eliminating 100% of manual entry errors by auto-logging to CSV files.

TRANS-IT: Real-Time Bus Tracking System | Next.js, Firebase, QR Code APIs

- Built a full-stack college bus tracking platform with live GPS tracking, role-based portals (student/driver/admin), and a QR-based attendance system with duplicate-scan prevention.

Personal Portfolio Website | Next.js, TypeScript, Tailwind CSS, Framer Motion

- Deployed on Vercel (portfolio-smoky-eight-mquqfq3ots.vercel.app) — built with Next.js App Router, TypeScript, Framer Motion animations, 3D tilt cards, particle FX, and dark/light mode.

V Schedule: Timetable Generator | React 19, Node.js, Express.js, MongoDB, JWT

- Built a full-stack academic scheduling platform with a constraint-based algorithm to auto-generate conflict-free timetables for faculty and rooms.
- Implemented JWT-based role authentication (RBAC), intelligent faculty substitution logic, PDF export, and security features including XSS protection and rate limiting.
